

## Test Case: Add Employee

### Steps to replicate

1. Log in with your provided credentials
2. The Paylocity Benefits Dashboard is displayed
3. Go to the bottom page and click on Add employee
4. The Add Employee modal window is displayed
5. Enter First Name
6. Enter Last Name
7. Enter any number of dependants between 0 and 32, Enter **5**
8. Click on the orange button "**Add**"
9. The employee you created should be displayed successfully in the table
10. Locate your newly created employee row and review their data, its should be as following:
  - a. Salary should be equal to  $(\text{Gross Pay} * 26)$ , in this case, Gross Pay is equal to 2000 so Salary should be **52000**
  - b. Benefits Cost is calculated in a similar way, this value should be equal to **[(Dependants \* 19.230769231) + Benefits which is = 38.461538462]**, this rounded to 2 decimals, in this particular case it should be **134.62**
  - c. Net Pay should equal **(Gross pay) - (Benefits Cost)** which should be something like **2000-134.62= 1865.38**

## Test Case: Edit Employees

### Steps to replicate

1. Log in with your provided credentials
2. The Paylocity Benefits Dashboard is displayed
3. Select the First Employee of the List and save its ID, in this case it will be **3848427b-6cca-4639-8702-bc2e5996ef40**
4. Go to the right in the same row and click on the “edit” icon from the Actions Column
5. The Edit employee window panel should appear
6. Change First Name
7. Change Last Name
8. Change any number of dependants between 0 and 32, Enter **10**
9. Click on the orange button “**Update**”
10. The employee you edited should be displayed successfully in the table
11. Locate your edited employee by searching the ID you saved on step 3 and review their data, its should be as following:
  - a. Salary should be equal to  $(\text{Gross Pay} * 26)$ , in this case, Gross Pay is equal to 2000 so Salary should be **52000**
  - b. Benefits Cost is calculated in a similar way, this value should be equal to  **$[(\text{Dependants} * 19.230769231) + \text{Benefits which is} = 38.461538462]$** , this rounded to 2 decimals, in this particular case it should be **230.77**
  - c. Net Pay should equal  **$(\text{Gross pay}) - (\text{Benefits Cost})$**  which should be something like  **$2000 - 230.77 = 1769.23$**

## Regarding the documentation provided for this tests

**Scenario 3: Delete Employee**

**GIVEN** an Employer

**AND** I am on the Benefits Dashboard page

**WHEN** I click the Action X

**THEN** the employee should be deleted

by this acceptance criteria, in theory when the X icon is clicked the record should be deleted, but instead the delete employee modal appears, is this an issue?
